## Product highlights

### Real Flat picture tube
*The flatter tube provides a wider viewing angle while minimizing reflections for the best picture possible.*

### Crystal Clear
*Combining picture enhancements like Contrast plus and color improvement, Crystal Clear improves picture depth.*

### Active Control
*Active Control ensure that noise and sharpness improvements are continuously made at a rate of 60 times per second. By continually adjusting picture setting over 3,000 times per minute, Active Control Plus ensures that the viewing experience is optimized.*

### Incredible Surround™
*Incredible Surround is an audio technology from Philips that dramatically magnifies the sound field to immerse you in the audio. Using state-of-the-art electronic phase shifting, Incredible Surround mixes sounds from left and right in such a way that it expands the virtual distance between the two speakers. This wider spread greatly enhances the stereo effect and creates a more natural sound dimension. Incredible Surround allows you to experience total surround with greater depth and width of sound, without the use of additional speakers.*

### Smart Picture and Smart Sound
*Philips preset modes for Smart Picture and Smart Sound provide you with direct access via a single key on the remote control. You can select optimized picture and sound settings for the various picture and sound modes.*

### Component Video Input (YPbPr)
*Component Video is the highest quality interconnection standard for analog video. It is sharper than S-video and composite video.*
